List of HMNAO Technical Notes

This is a complete list of Technical Notes produced by HM Nautical Almanac Office. Those that have been more popular are indicated in **bold**. The contents of these Technical Notes is subject to Copyright and there may be a charge, please contact us regarding this.

No.	Author	Title	Year	Pages
1	Wilkins G.A.	Orbits of the satellites of Mars	1965	9
2	Martin W.L.	Predictions for artificial satellites - Note 1	1965	10
3	Nicholson W.	Zodiacal radio sources - List 4 (1965)	1965	18
4	Sadler D.H.	A simple azimuth diagram	1965	5
5	Taylor G.E.	The visual observation of occultations	1966	7
6	Hobden D.E.	Computations for the Decca hyperbolic lattice system	1966	12
7	Nicholson W.	A comparison of ephemeris and atomic times	1966	14
8	Nicholson W.	The application of limb corrections to occultation observations	1966	10
9	Wilkins G.A.	The introduction to "The NAO Handbook on the use of the 1909 Computer Systems"	1966	16
10	Wilkins G.A.	The determination of the mass and oblateness of Mars from the orbits of its satellites	1966	12
11	Sadler D.H.	Interpolation in H.O. 299, Sight Reduction Tables for Marine Navigation	1966	8
12	Scott W.A., Sadler D.H.	Corrections, for irradiation, to the observed altitude of the Sun	1967	23
13	Wilkins G.A.	The analysis of the observations of the satellites of Mars	1967	15
14	Martin A.J., Wilkins G.A.	The Library of H M Nautical Almanac Office	1968	10
15	Morrison L.V.	Zodiacal radio sources - List 5 (1968)	1968	21
16	Wilkins G.A.	The problems of the satellites of Mars	1968	16
17	Wilkins G.A.	The uses of observations of the positions of the planets and natural satellites	1969	15
18	Taylor G.E.	Predictions of grazing occultations	1970	15
19	Morrison L.V.	Zodiacal Radio Sources -List 6 (1970)	1970	19
20	Morrison L.V., Martin R.J.	Digitised version of C.B. Watts' Charts of the marginal zone of the Moon	1970	6

continued

No.	Author	Title	Year	Pages
21	Emerson B., Wilkins G.A.	Narrative report of proceedings of IAU Colloquium No 9 (IAU System of Astronomical Constants)	1971	24
22	Morrison L.V.	The role of occultations in the improvement of the lunar ephemeris	1971	10
23	Morrison L.V.	The secular accelerations of the Moon's orbital motion and the Earth's rotation	1971	18
24	Morrison L.V.	Zodiacal radio sources - List 7 (1971)	1971	20
25	Wilkins G.A.	Review of current UK activities in Solar system mechanics	1971	7
26	Sinclair A.T.	The representation of planetary ephemerides for use in the automatic reduction of navigational sights	1971	10
27	Wilkins G.A.	Astronomical system of units, co-ordinates and time scales (Report to IAU Comm. 4)	1972	14
28	Morrison L.V., Biggin J.A.	Lunar occultations of the Crab Nebula in 1974-75	1973	21
29	Taylor G.E.	The visual observation of occultations (supersedes No 5)	1974	7
30	Morrison L.V.	Changes in the Earth's rotation from astronomical observations	1974	16
31	Wilkins G.A.	The future publication of Astronomical Ephemerides	1974	7
32	Wilkins G.A.	A review of the development and future use of Ephemeris Time	1974	10
33	Wilkins G.A.	The provision of astronomical data: current trends and the relevance of CODATA	1974	5
34	Taylor G.E.	Planetary occultations: A review of the methods of prediction, the results of astrometric analysis and the future prospects	1974	23
35	Emerson B.	NAO Lists of stellar data with positions for equinox 1975.5	1974	46
36	Sinclair A.T.	The Orbits of Tethys, Dione Rhea and Titan	1974	14
37	Sinclair A.T.	The tabulation of monthly sets of polynomial coefficients for astronomical data in The Star Almanac for Land Surveyors	1975	7
38	Wilkins G.A.	Notes on the Washington (1974) meeting on Astronomical Constants and Ephemerides	1975	18
39	Watson F.G.	The zenithal blind spot of a large altazimuth telescope	1976	11
40	Morrison L.V.	The Movements of the Sun, Moon and Stars in the sky	1976	12
41	Morrison L.V.	Catalogue of strong zodiacal radio sources List 8 (1976)	1976	20
42	Morrison L.V.	Lunar occultations of Sco X-1 1978-81	1977	33
43	Morrison L.V.	Tidal deceleration of the Earth's rotation deduced from astronomical observations in the period AD1600 to present	1977	8
44	Sinclair A.T.	Data for astro-navigation in 1978 for use with small calculators	1977	18
45	Morrison L.V.	Rotation of the Earth 1860 - 1900	1977	14
46	Yallop B.D.	Formulae for computing astronomical data with hand-held calculations:	1978	
		Section 1: General notes and formulae, Section 2: The Sun, Section 3: The Moon, Section 4: Navigational Problems		
		Sections: 1-4		37
		Section 5: Navigational Supplement		26
		Section 6: TI59 subroutines		9
47	Emerson B.	Approximate Solar co-ordinates	1978	8
48	Emerson B.	Approximate Lunar co-ordinates	1979	9

No.	Author	Title	Year	Pages
49	Morrison L.V.	Lunar Occultations of NGC 6440, 1980-1982	1979	25
50	Morrison L.V.	Lunar Occultations of GX941 1980-82	1979	25
51	Morrison L.V.	Recent results for the Moon's secular acceleration and their implication for the possible variation of G	1979	9
52	Morrison L.V.	Lunar occultations of the Crab Nebula 1981-1983	1980	22
53	Sinclair A.T.	The computation of physical ephemerides of planets and satellites	1980	9
54	Yallop B.D.	Geocentric and heliocentric phenomena	1981	12
55	Yallop B.D., Emerson B.	The phase correction for Venus	1981	10
56	Emerson B.	Approximate coordinates of Jupiter and Saturn	1981	12
57	Yallop B.D.	Ground illumination	1981	7
58	Yallop B.D.	Formulae for determining Carrington's elements and differential Solar rotation	1982	8
59	Sinclair A.T.	The effect of atmospheric refraction on laser ranging data	1982	17
60	Yallop B.D.	A simple method of plotting position lines	1982	7
61	Yallop B.D.	Methods for calculating the time of meridian passage from polynomial data	1982	4
62	Yallop B.D., Hohenkerk C.Y.	Coefficients for calculating the GHA and DEC of stars	1985	7
63	Hohenkerk C.Y., Sinclair A.T.	The computation of angular atmospheric refraction at large zenith angles	1985	13
64	Yallop B.D.	Algorithms for calculating the dates of Easter	1986	5
65	Hohenkerk C.Y.	Determination of polynomial coefficients from B-spline coefficients	1986	9
66	Hohenkerk C.Y.	TOPPS: a system for printing tables	1987	44
67	Yallop B.D., Hohenkerk C.Y.	Astronomical algorithms for use with micro-computers	1989	8
68	Taylor D.B.	Compact ephemerides for differential tangent plane coordinates of planetary satellites	1995	20
69	Yallop D.B.	A method for predicting the first sighting of New Moon	1997	14
70	Yallop D.B.	A simple algorithm to calculate times of sunrise and sunset	1997	2
71	Hohenkerk C.Y.	Polynomial expressions for approximating ΔT	1997	5
72	Taylor D.B.	Determination of Starting Conditions for Ephemerides of the Uranian Satellites I-V	1998	29
73	Taylor D.B., Sinclair A.T.	Approximate ephemerides and phenomena of natural satellites	2003	10
74	Taylor D.B., Bell, S.A., Hilton, J.L., Sinclair A.T.	Computation of the Quantities Describing the Lunar Librations in <i>The Astronomical Almanac</i>	2010	18
